Anti climb fence

Type RV5-RH6

Anti climb fence

To prevent un-authorized access to the tower, it is possible to fit an anti climb guard to the tower bottom section.

The anti climb system is manufactured in hot galvanised mesh.

Height: 2030mm
Frame: \varnothing 5mm and \varnothing 6mm round bar steel
Mesh Pitch: 50x200mm
Max. tower c-c: 2500mm

The framed mesh is secured to the base of the tower using stainless steel band around the tower leg.

In addition we can supply horizontal barb wire system, fitted immediately above the vertical anti climb.

Design and dimensions can be provided as you require.
